

Patient Name: _____

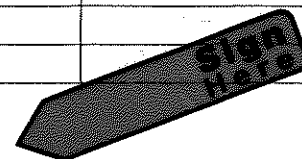

PROHIBITED MEDICATIONS/SUBSTANCES TO STOP BEFORE IN-OFFICE PROCEDURE

Please STOP the following medications before and after your surgery as specified in the table below. These medications have been known to interfere with surgery, the amount of bleeding and bruising during or after your surgery and delay the healing process. Please keep in mind **this IS NOT a comprehensive list so if you have ANY QUESTIONS AS TO A MEDICATION YOU ARE CURRENTLY TAKING, CALL US IMMEDIATELY FOR GUIDANCE.** If there is a medication listed that your doctor does NOT want you to stop, please notify us immediately.

TYLENOL IS FINE TO TAKE.

Please alert us if you are taking Semiglutides as your instructions for before the procedure may change.
